In Italy we have decided to focus on the following points for our future work with ICT

For pupils we need to increase behavioring online,respect of the other when they are online
H4 learn how to check the quality of the informations on line and
H11 improving learning coding in classroom

For teachers:
Section F is really important point to develop
F1 use of digital technologies to tailor teaching to student's individual needs and
F3 Fostering creativity in the classroom through digital technologies

Section B, about B Collaboration and Networking : we really need to improve and discuss the advantages or disadvantages of using technologies for learning and involve part of the teachers that still refuse to use ICT.
